

MARCIOLO PESTCOE

L2 TECHNICAL SUPPORT • DESKTOP ENGINEERING • AUTOMATION

Phoenix Metro, Arizona

[LinkedIn](#) • [IT Portfolio](#)

Technical support specialist with 8+ years of hands-on technology experience and enterprise deskside support across banking, aerospace, and education. Known for translating difficult endpoint problems into practical fixes, supporting high-touch users, and building local PowerShell, Python, and browser-based tools that improve documentation and repeatability. Targeting senior desktop support, Tier 2, junior systems administration, or endpoint engineering roles.

8+ YEARS

hands-on IT experience

3 ENTERPRISE

banking • aerospace • education

2 MIGRATIONS

Windows 11 • device refresh

4 CREDENTIALS

CompTIA • Microsoft

CORE CAPABILITIES

Windows 10/11 & endpoint support • ServiceNow • Hardware diagnostics & repair • Imaging, USMT & data migration • Microsoft 365 & Teams • PowerShell, Python & VBScript • AD verification • VPN & certificate sign-on • Event Viewer & registry • Linux desktop/server • Asset lifecycle • Executive support

PROFESSIONAL EXPERIENCE

L2 Technical Support Specialist | City National Bank / RBC (Contract) • Jun 2026 – Present

- Deliver Tier 2 endpoint and deskside support in a regulated banking environment, resolving Windows 11, Microsoft 365, hardware, profile, connectivity, and access issues through ServiceNow.
- Support a large-scale Windows 11 migration and HP-to-Lenovo device refresh through readiness checks, user coordination, data validation, deployment, and post-migration troubleshooting.
- Build local PowerShell, Python, and browser-based utilities to standardize field notes, refresh documentation, and repetitive workflows without sending internal data to external AI services.
- Use Event Viewer, registry inspection, process analysis, and structured testing to isolate throttling, driver, application, and endpoint configuration issues.
- Adapt documentation and ticket practices to enterprise metrics while keeping user experience and technical resolution central.

Desktop Support Technician | Boeing / Dell / Apex Systems (Contract) • 2025 – May 2026

- Provided onsite and remote deskside support for enterprise users, including executives, new hires, refreshes, loaners, Microsoft Teams, printers, VPN, and certificate/badge sign-on.
- Imaged and deployed Windows endpoints; migrated user data with USMT and Robocopy; verified profiles, applications, encryption, network access, and compliance before handoff.
- Repaired business laptops by replacing motherboards, displays, keyboards, batteries, and smart-card readers, followed by functional and compliance validation.
- Supported GlobalProtect VPN, legal-hold workflows, Active Directory identity checks, inventory control, and escalations across constrained enterprise systems.
- Received the 2025 RSLFAC Glass Award in recognition of performance and service.

PROFESSIONAL EXPERIENCE — CONTINUED

PC & Mobile Technician | uBreakiFix • Nov 2024 – Jan 2025

- Diagnosed Windows PCs, mobile devices, displays, batteries, charging issues, and software faults; explained repair options and outcomes in plain language.
- Completed hardware repairs, intake, ticket documentation, quality checks, and customer handoff while balancing turnaround expectations and data-care practices.

Production Lead, Bindery & Logistics | K&H Election Services • 2024

- Led high-volume bindery production during an election-mail cycle, coordinating materials, quality checks, workflow handoffs, and deadline-driven output across extended shifts.
- Supported logistics and material movement using Class 6 forklift certification while maintaining organized, safety-conscious production areas.

Technical Support Specialist — Student Employee | Phoenix Job Corps • Jan 2022 – Sep 2022

- Supported staff and students with Citrix, shared-drive permissions, account access, endpoint troubleshooting, and Chromebook setup.
- Improved support responsiveness through clear triage, direct user communication, and organized follow-through on recurring technical requests.

SELECTED TECHNICAL PROJECTS

PROJECT / STACK	PURPOSE & OUTCOME
Local Support Documentation Toolkit PowerShell • Python • HTML/JavaScript	Built privacy-conscious local tools for structured ticket notes and refresh checklists, reducing repetitive typing and improving consistency without external data processing.
Task Manager v2 / Endpoint Diagnostics C# • .NET • WMI • Registry	Designed an extended diagnostics concept combining process telemetry, WMI, registry data, thermal signals, time-series reporting, and spike detection.
BSOD Helper C++ • Windows Event Logs	Planned a lightweight GUI that surfaces system information and relevant Event Viewer evidence to turn crash data into actionable next steps.
Local Knowledge Base HTML • JavaScript • Information Architecture	Created a local-first knowledge base concept with tagged guidance, imports, search, and static export for controlled information environments.
IT Portfolio Website HTML • CSS • JavaScript • GitHub	Built and published a responsive portfolio documenting enterprise support, automation, endpoint troubleshooting, migrations, and technical interests.
Console & Linux Lab Linux • Networking • FTP • Storage	Maintained practical labs involving Linux servers, Raspberry Pi, console firmware workflows, FTP transfer, storage constraints, and backups.

TECHNICAL DEPTH

Endpoint & OS: Windows 10/11, Linux desktop/server, imaging, deployment, drivers, profiles, patch/readiness checks, BIOS diagnostics, BitLocker awareness

Enterprise Support: ServiceNow, Microsoft 365, Teams, Citrix, GlobalProtect, Workspace ONE exposure, executive support, new-hire setup, legal-hold devices

Diagnostics: Event Viewer, registry analysis, SFC, memory tests, WHEA investigation, process telemetry, hardware isolation, root-cause documentation

Automation & Development: PowerShell, Python, VBScript, C#/.NET concepts, C++, HTML, CSS, JavaScript, WMI, local-first workflow tooling

Hardware & Lifecycle: Motherboard, LCD, keyboard, battery, smart-card reader and mobile repairs; inventory, loaners, asset handling, device refresh

Networking & Access: VPN troubleshooting, Wi-Fi/LAN fundamentals, basic VLAN lab work, certificate/badge sign-on, permissions and identity verification

CERTIFICATIONS & RECOGNITION

CompTIA Linux+ XK0-005 • 2024	CompTIA A+ CE • 2024	Microsoft Office Specialist Word & PowerPoint 2016 • 2023
IC3 Digital Literacy 2023	RSLFAC Glass Award Boeing support recognition • 2025	Forklift Certification Class 6 • 2024

EDUCATION & DEVELOPMENT

Career & Technical Education | Phoenix Job Corps; Cascade Job Corps; Udemy vocational coursework

High School Diploma | Maya High School • 2022

PROFESSIONAL FOCUS

Senior desktop support • Tier 2 support • Endpoint engineering • Junior systems administration • Technical automation
